KYLE NAVARRO

Web Developer

Email: kyle.y.navarro.j@gmail.com | LinkedIn: linkedin.com/in/kyle-navarro-geek

PROFESSIONAL SUMMARY

Web developer with a background in B2B sales. I build websites and web applications for real businesses: product catalogs that end in a WhatsApp quote, online ordering platforms, corporate sites and bilingual personal sites. My sales experience helps me understand how business customers decide and what moves them to request a quote or place an order. I work with AI-assisted development (Claude Code) to plan, build and review software and ship it quickly with human judgment on every delivery.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3, SQL
Frameworks and Libraries: React, Node.js, Express, Tailwind CSS, Vite, TanStack Query, Zustand, Zod
Backend and Data: Supabase (PostgreSQL, Auth, Storage, Row Level Security), Google Sheets API
Testing and Deployment: Vitest, Cloudflare Workers, Netlify, GitHub Pages, Git, GitHub
AI: Claude Code, Claude API, AI-assisted development
Practices: Responsive design, bilingual sites (i18n), web performance, accessibility, SEO metadata, WhatsApp ordering and quoting flows

PROJECT EXPERIENCE

FlashBuy | flashbuy.app
Multi-tenant SaaS for WhatsApp ordering

- Built a multi-tenant SaaS that gives restaurants, cafes, bakeries and food stores their own catalog, admin panel and public ordering page.
- Customers build their order on the public page; the order is saved and handed off to the business as a pre-formatted WhatsApp message.
- Enforced tenant data isolation with PostgreSQL Row Level Security, verified by automated database tests that run the real migrations.
- Implemented a super admin area to create businesses, assign plans and manage trial and active subscriptions.

Technologies: React 19, TypeScript, Vite, Tailwind CSS 4, React Router, TanStack Query, Zustand, Zod, Supabase, Vitest, Cloudflare Workers

Chantilly | chantillycom.com
Bakery website with online ordering and admin panel

- Built an online ordering flow where customers choose products and options, pick delivery or pickup, and send the order through WhatsApp with the message ready.
- Developed an admin panel with login to manage live orders and their status, products, photos, prices, option groups, delivery settings and opening hours.
- Added sales reporting by day, week, month and year.

Technologies: Vite, Tailwind CSS 4, JavaScript, Supabase (Auth, PostgreSQL, Storage)

Texproseg 360 | texproseg360.com
Corporate website and product catalog

- Built the corporate site and catalog for a personal protective equipment, workwear, hardware and signage company in Santander, Colombia.
- Designed category pages that lead buyers to request a quote on WhatsApp or download the PDF catalog.

Technologies: HTML, CSS, Cloudflare

Laura Muñoz | laurammunoz.com
Bilingual personal website

- Built a bilingual (Spanish and English) personal site for a purchasing analyst, with downloadable CVs in both languages.
- Configured a Cloudflare Worker that serves English to visitors from non-Spanish-speaking countries, with the visitor's language choice saved in a cookie.

Technologies: HTML, CSS, JavaScript, Python, Cloudflare Workers

Surtitornillos SAS | kylenavarro.github.io/WebSurtiTornillos
Corporate landing page

- Built the landing page of an industrial and hardware supplier in Barrancabermeja, Colombia, presenting its product lines, brands and contact channels.

Technologies: HTML, CSS, JavaScript, GitHub Pages

Olímpicas Sport | olimpicassport.netlify.app
One-page corporate website

- Built a one-page corporate site for a uniform and workwear manufacturer, showing what it makes, what it supplies and how to request a quote.
- Delivered a dependency-free site with SEO and Open Graph metadata and optimized WebP images.

Technologies: HTML, CSS, JavaScript, Netlify

AgentPrice (in development)
AI quoting chat widget for business websites

- Building an embeddable chat that any business adds to its website with one line of code; the visitor describes what they need in plain language.
- Uses the Claude API to match requests against the business's price list in Google Sheets and generate a formal quote as PNG, PDF or Excel.
- Validates the visitor's WhatsApp number and converts prices to the visitor's local currency; one server supports multiple businesses with their own settings.

Technologies: Node.js, Express, Claude API, Google Sheets API, PDFKit, ExcelJS

EDUCATION

Production Engineering
Professional degree in Production Engineering.

Web Development, Self-Taught
Online training with Platzi and Academia Hola Mundo, complemented by building real projects for clients.
